EXPERIENCE

UX Designer · Doctorpay

Jul 2026 – Present

- Designed the merchant acquisition flow, automating the process of onboarding new merchants.
- Redesigned the critical in-app referral letter flow to make it accessible to customers with outstanding loans.
- Own the end-to-end user experience by overseeing implementation and monitoring how users interact with the app.

Product Designer (agency) · Synthetic Solutions

Jul 2025 – Jul 2026 | 1 yr 1 mo

- For Sunflower Sobriety (YC-backed, 100k+ MAU), designed core flows, including onboarding, breathing exercises, progress stats, community, and friend challenges.
- Designed the app's paywalls and subscription surfaces for a sensitive-context user base.
- Built the app's design system, plus visual identity work: logos, an addiction-type icon pack, home-screen widgets, and shareable milestone templates.
- Contributed to other client products, including onboarding redesign for Cashed Out and landing pages for EllieMD, plus full UI for a mobile game.

Product Designer · Jargeh Digital Marketing

Oct 2024 – Jul 2025 | 10 mos

- Led the end-to-end process to validate our product direction: conducted 60+ user interviews to find pain points, analyzed the data to define 3 business models, and designed MVPs to test each one.
- Simplified the UI kit by switching to modifier-based tokens, reducing the number of tokens relative to product scale.
- Drove a 5% increase in average engagement time by designing a scalable blog post page for different content categories.

Product Designer · Revive Design Lab

Mar 2024 – Oct 2024 | 8 mos

- Increased subscriptions per session by 35% and signups per session by 17% (with a 20% lift in subs/signup) by restructuring the product's information architecture and strengthening its positioning for real estate professionals. Read the case study on Medium.
- Increased subscription conversion rate by 36% through A/B testing, removing limitations on free users' access to AI tools.
- Reduced bounce rate on the Virtual Staging landing page by 59%, strengthening performance on one of the product's highest-traffic entry points.
- Established the user feedback system to measure AI model performance, closing the gap in our understanding of the link between technical updates and user experience.
- Became the go-to person for data, pulling user behavior from Analytics, Metabase, and PostHog to help the team make design and product decisions.

Product Designer · MCIHUB

Mar 2023 – Mar 2024 | 12 mos

- Increased traffic to the stream page by 10% by improving the marketing campaigns page.
- Ran an end-to-end research study to explore user preferences for watch time and retention, resulting in actionable behavior patterns that aligned stakeholders on the product roadmap.
- Adapted the Fluent Design System for RTL and customized colors, informed by competitor analysis, to improve information architecture and accessibility.

UI/UX Designer · Freelance

Aug 2022 – Mar 2023 | 8 mos

- Delivered UI/UX for 10+ freelance projects across gaming, fitness, and operations, including Shekanj, the Art of Debate game, Body Fit Club management, and Rasha Company's production workflow.

UI/UX Designer · RSIMU

Aug 2021 – Aug 2022 | 1 yr 1 mo

- Owned end-to-end design of a restaurant management MVP for a US-based remote team, from user research through final UI handoff.
